From Calfornia.

We select the following items, from the news just brought to New York by the steamship Crescent City, as given by the Journal of Commerce.

Among the passengers by the C. C. are G. P. Judd, his Hawaiian Majesty's Plempotentiary, accompanied by Alex. Liholiho, heir apparent of the Hawaiian crown, and Lot Kamelameha, son of Gov. Kekuanaon, of Oahu, who will proceed to Washington, and in a few days to Europe; also, Lieut. E. B. Beale, hearer of despatches. The object of Mr. Judd's visit to the United States and Europe at this period, has reference to the late outrages of the French at the

The California, steamship, arrived at Panama on he morning of the 23d November, having about 258 passengers, and over one million dollars of gold. Of this, the Crescent City has one million, and 160 passengers. The California touched at Mazatlan, where she received \$72,000 in specie for England; she also took from San Blas \$42,000 for the same destina-

The news from the mines is about the same as before received. Those who can stand hard work, get well paid for their work.

On the 28th, the treasure and passengers being on board, the C. C. left Chagres for New York at 10 A. M.; arrived at Kingston, (Jam.) on the evening of the 30th; left for home at half past 12 on the 1st of December, and arrived at Quarantine at 10 A. M.

SAN FRANCISCO, Oct. 31, 1849 .- The Convention to frame a constitution for the State of California, concluded its labors on the 13th instant; but my duties as chief clerk of that body, detained me there until the 25th. I arrived here on the 28th, via the new seat of government, San Jose, and found San Francisco greatly changed for the better, during the two months which I had been absent. The population is now estimated at 30,000, and the price of real estate continues to increase.

You will perceive that the Wilmot provise has been unanimously adopted as a clause of the constitution; that the section inhibiting the introduction of free negroes, or slaves with a view to set them free, has been stricken out; that none but free white citizens of the United States, or free white citizens of Mexico who shall have elected to become citizens of the U. States or of California, are allowed the privilege of voting; that all banks, except faro and monte banks, are prohibited; that the sessions of the legislature are to be annual-the first election to take place the 13th November, proximo, and the firs. meeting on the 15th December; that nearly all the officers, eivil and judicial, are made elective by the people; that the salaries of the Governor and members of the Legislature are placed at very high rates; that very stringent rules are laid down in regard to the creation of any State debt; that imprisonmen for debt, and the creation of lotteries, are prohibited; that the boundary of the State is the Sierra Nevada, diverging off low down, so as to include the mouth of the Gila, where it empties into the Colorado; and

many other important provisions. The canvassing among the different candidates for office, under the new constitution, has already vigorously commenced. For Governor we have nominated Colonel Stewart, W. H. Halleck, Captain Sutter, Winfield Scott Sherwood, and Judge Burnett. For Lieutenant Governor-Messrs. Francis J. Lippitt, and Jno. McDougal. For U. S. Senators-Messrs. T. Butler King, J. C. Fremont, W. H. Halleck, and some others, are prominent. For Representative in Congress-Messrs. Lewis Dent, Edmund Gilbert, W. E. Shannon, George W. Wright, Rodman M. Price, and others. Col. Fremont will be almost unanimously elected U. S. Senator; either Dr. Gwin or Mr. Halleck, also, by a close vote. Judge Burnett will probably be elected Governor, though Mr. Sherwood, who was a member of the N. Y. Legislature, in 1847, will make very strong efforts to beat him. Mr. S., though young, was a very able member of the State Convention. Mr. Gilbert is the editor of the "Alta California." Mr. Price and Colonel Stewart are natives of Maryland, and were both members of the California Convention, as was also Messrs. Lippitt, Gwin, Halleck, Gilbert, McDougal and Sutter. It is impossible to say who will be the representative in Congress, the candidates are so numerous, and as a plurality elects. The Constitution will be adopted by a nearly unanimous vote, though considerable dissatisfaction is expressed at the exclusion of Indians from the right of suffrage. The power is given to the Legislature to change this feature of the consti-

ARRIVAL OF THE SENATOR.—The long expected Senator arrived in our harbor Oct. 27th, crowded with passengers, 22 days from Panama.

Brevet Capt. Warner lost his life on the 27th of September, while engaged in ascertaining the feasibility of a railroad route to Oregon through the head sources of the Sacramento. His party of eight men were fired upon by a large body of Indians. He and two of his companions were killed. THE WEATHER .- The mercury on Wednesday

morning at sun-rise marked as low as 44 deg. and during the day quite a volume of water fell. We shall have two or three months of respectable weather before the rainy season sets in. If proper precautions are taken we can "radiate" about these "diggings" all winter, and be as dry as a powder-house -Placer Times, Oct. 13th.

LARGE SUIT .- The case of J. C. Fremont vs. the Leidesdorff estate, involving a considerable sum of money, and many important legal principles, was taken up before Judge Geary yesterday. Much interest is felt in the result of the trial.

On the 23d ult., two seamen belonging to the U S. schooner Ewing, were hung in pursuance of the sentence of a Court Martial; their names were John and Peter Beach. They were engaged with three others in the attempt to drown Passed Midshipman Wm. Gibson on the 13th September : the others were reprieved on the morning of the execution.

Not to be hanged-at present .- Judge Burnett, of the Court of Second Instance, has allowed a writ of error in the case of Joseph Daniels, who after a fair trial, had been convicted of the murder of his comrade, Peter Pettit, by shooting him through the head while on a hunting excursion between this city and the Mission Dolores. Danfields is now on board a vessel of war, and would have been hanged to-morrow, had the sentence not been suspended by a hihg-

The Panama Star of the 20th of November intimates that a fever of some severity is prevalent in that place. It says:

In conversation with one of our physicians, who has thoroughly examined into the nature of the sickness that prevails here, we were informed that a number of the cases of fever were principally or wholly caused by the exposure to the heat of the sun, want of proper protection from the frequent rains and over exertion in the crossing the Isthmus; as well as crowding in large numbers into rooms which have not sufficient ventilation.

If early attended by judicious, practical and educated physicians, the disease, he informs us, readily yields to medical treatment, but if neglected, in this respect, becomes complicated and protracted, if not absolutely dangerous.

We have obtained the names of some who are now sick-Mr. Blanco, of New York; Mr. Gano, Mr. Irish and Mr. Skelton, all of Indiana. There are some others whose names we did not learn. Mr. Dryer, whose life was dispaired of at one time, we are happy to learn, is rapidly recovering.

Cononer's Inquests .- On the 2d inst., Joseph J. Fuller, son of Nathaniel Fuller, late of West Newton, Mass., a passenger in the ship "Charlotte," of Boston, committed suicide by cutting his throat with

a razor. James Brown, of Newburyport, Mass., who came here in the brig "Charlotte," aged about thirty years, was found drowned on the 30th ult., at Clark's Point, in this city. He had been suffering severely from dysentery for some weeks.

George Seward Tracy was found dead in Happy Valley on the morning of the 7th inst. The jury returned a verdict that he came to his death by taking

Placer Intelligence. SHERLOCE'S DIGGINGS, Mariposa, Sept. 27. We want a Post Office at this point, though it be the most remote point of the Placer, and we wish your influence to be exerted in the matter, for which we will certainly render you on equivalent in Mariposa gold, or in any other way you may desire. \* \*

this and San Francisco. This, Mr. Editor, is unquestionably the place for "big chunks," but let me instruct you concerning these diggings. They were discovered two or three months since by a man named Sherlock, who with a company of seventy Mexicans worked these deposits on shares. The work varies with us, as well as elsewhere. In eight days, three men took out 57 pounds of pure gold. And last week two men took out in

two days 29 pounds from a spot near my camp. Sherlock has gone into the mountains, no one knows where, and we have elected a new Alcalde, who, the day of his installation into office, issued an order for all Mexicans to decamp, which they did forthwith. We all intend to winter her, as we can easily make comfortable quarters. This place is distant eleven miles from Fremont's discovery, and is much the richest of the two deposits. Many large pieces have recently been found here, averaging from one to eight pounds, pure gold. The finest pieces usually are worth about 50 cents, so you perceive

this is the region of "big lamps."

The Placer Times of October 13th says: "We have seen several from the mines during the past week—some of them with a bag full of 'dust,' while others were not troubled with anything heavy. The following letter from a friend will give our readers a common sense view of mining and miners in all sections of the Placer, although written on the Mid-

dle Fork, and dated SPANISH BAR, Oct. 10, 1849. Judging from what I can learn, I think there is little difference as to the richness of the three Forks, the North, Middle and South. They all have proved prolific. I think the North (being the nearest your city) has been the most worked. Since I have been on the Spanish Bar (now about three months,) there has been an immense amount of money taken out. Damming parties have done the best by going in'n the bed of the stream, yet many dams have proved failures; some companies have taken out over a hundred dollars a day for several weeks, but these things

Miners here are thinking about going into winter quarters: the nights are quite chilly, and every one is anxious to get breakfast for the sake of being in the vicinity of the fire. I know nothing of the Dry Diggings, not having seen the elephant that way.

OUTRAGEOUS IF TRUE .- It was currently reported in this place during last week that the government of Chili, had sent convicts to this country in various vessels arriving at this port. Conversing with a gentleman recently from Chili, we were informed that in the vessel which brought him hither, many fellow passengers on board, were shipped to California the expense of their government.

CALIFORNIA MAILS .- The following is an extract of a letter dated at San Francisco, Wednesday, Nov. 17. P. M .: "As there is great irregularity in the arrivals of the mails, as well as delay in the delivery of letters, I should like to have mine forwarded by expresses through you, by their agents on this side. If you can attend to it, you will do me an inexpressifamily though absent eight months.

The steamer Panama arrived vesterday, bringing tripple mails, amounting to near seventy bushels, being the first in over two mouths. We shall not now receive letters till next Saturday, the Post Office being closed until then.

The Boston Murder.

The Traveller says that in addition to F. Dexter, B. R. Curtis, and E. D. Schier, Esgrs., have been retained as counsels for Prof. Webster. Important discoveries have been made among the papers of the

Mr. Clifford, Attorney General, arrived in the city last evening, and, we are told, fully approves of Mr. Parker's opinion and advice, and the Coroner's decision as to the private examination of witnesses before the Jury of Inquest now sitting upon the supposed body and limbs of the late Dr. G. Parkman.

The services at the funeral, as might be supposed under the circumstances, were strictly private; none but the immediate family being present. The coffin which contained the remains has been deposited in a private tomb in the city, so that if occasion should arise, they can be examined hereafter.

The following is the record of the Death office Died, Nov. 23, George Parkman, aged 59 years and 10 months, physician, born in Boston, son of Samuel and Sarah Parkman; cause of death, [blank] place of interment, 35 Trinity Church Cemetery.

The evening edition of the Mail says: Owing to information obtained, it is said, by some person employed at the jail overhearing a conversation between Prof. Webster and his counsel, officers Clapp and Hopkins were despatched last evening to make a general examination of the house of the Professor at

Mrs. Webster received them politely, and interposed no objection to the search. On opening Prof. W.'s desk, they discovered beneath a quantity of papers, the identical note, for \$487, which Prof. Webster has stated he took up on the Friday that Dr. Parkman was last seen to enter the Medical College. So far as the finding of this note is concerned, it only corroborates what Prof. Webster has stated in regard to taking it up; but a farther search produced evidence of a more startling description.

Also, another no'e payable to Dr. Parkman, for \$2,400, dated in 1847, and becoming due in 1851! The note was secured by mortgage. We could not learn the month or day of the month the note was dated, but the fact that a note for the above sum, running five years and payable in 1851, was yesterday discovered among Prof. Webster's papers, is true and beyond question. The back of the last named note contained numerous endorsements, but to what amount, or whether sufficient to cover the face of it. we have not been able to learn. Another statement is, that the note was fully liquidated by the endorsements on the back, and that the note for \$487 was the only demand which Dr. Parkman held against the

accused on the day he mysteriously disappeared. During last week several checks drawn by Dr. Webster on the Cambridge Bank, were produced at the counter of that institution for payment, but the teller's invariable answer was, "Mr. Webster has no money here, nor has he had for some time." We were shown a check yesterday drawn in favor of Mr. Cummins, blacksmith in Cambridge street, for \$9.15,

A further examination of the remains of Dr. George Parkman was had at the Medical College, in North Grove street, yesterday afternoon, by the investiga-

ting committee of the coroner's jury. The thorax and the thigh found in the tea chest covered with tan and minerals, were subjected to chemical tests, and it was discovered that these portions of the body had been treated with a strong solution of potash, which had hardened and corroded the skin and flesh in several places, and given to the whole that crisped and burnt appearance which was

remarkable at the time they were first discovered. It is well known to chemists that the application of a solution of potash to dead flesh has the tendency to preserve it for a great length of time from putrefaction, and that tan has the quality of absorbing putres-

cent and other odors to a remarkable degree. On the right thigh and the left leg, which were discovered in the water, no traces of alkaline could be discovered by the application of the most rigid

Chips taken from those parts of the building sub-posed to be stained with blood, were subjected to a miscroscopic examination, but no globules such as are found in the human blood were discovered, and the committee came to the conclusion that the spots had been caused by tobacco spittle. The spots or red stains found on the slippers, pantaloons and saw of Professor Webster will be examined by the committee

The veins and arteries of both thies and the left leg have been carefully dissected out, and will be

subjected to chemical analysis to-day, for the purpose of discovering if they have been injected with arsenic acid or chloride of zinc, which is employed at the Reflections on reading Gen. Jo. Lane's message from college for the preservation of bodies used by the students for dissection. This will prove conclusively whether the parts discovered belong to a subject for

DICK'S WORKS. THE following is a brief expression of the estimation in which those works are held, by clergymen of the different evangelical churches at Indianapolis. It affords us great pleasure to learn that the Messus Applegate of Incinnati have in press the complete works of Thos. Dick L. L. D., (cleven books,) which they are publishing in two royal octave volumes. We the undersigned do most cheerfully recommend these works to the citizens of Indiana, and hope as they are respectively waited upon to subscribe for this edition of Dick's works, they will

not fail to secure to themselves a copy. We earnestly desire
